TELECOMMUNICATIONS ENGINEERING SCHOOL
(E.T.S.I.T.) MÁLAGA UNIVERSITY

DEGREE'S FINAL PROJECT HONOURS AWARD which consisted of the creation of an automatic watering system for gardens based on a PSoC and an Android app.

WORK EXPERIENCE

Software Lead Quality Engineer
November 2024 - Current Date

Software QA for complex medical applications (cytometers, analysis instruments, LIS, etc.) within a fully remote, multicultural team. Responsible for test planning, project documentation, automated and manual testing, regression testing, and troubleshooting across diverse software and network environments. Lead testing efforts for a global product and collaborate with a high-performing team.

QA, E2E QA & Automation QA.
April 2022 - November 2024

Web application with Azure, where I performed QA E2E tasks, elaborating the test plans, performing the manual tests and finally automating with Robotframework and Selenium. Agile methodology, black box testing, white box testing and testing with API's.

DevOps, QA and Scrum Master at NTT Data - Santander UK
April 2021 - April 2022

QA with Postman, deployments and microservices management, API management, consulting, incident support, management as scrum master of a team of developers. 24/7 incident monitoring, alert management, development of deployment plans, creation of pipelines, etc.

Electronic Systems Engineer at Aertec - Infrastructures
August 2018 - April 2020

Infrastructure Design - Telecommunications Rooms, Servers, Fiber over Cable, CCTV, Access Points, Wireless Points, Public Address, IP-Clock, Hand Baggage Scanners, Baggage Scanners, Passenger Passenger Scanners and Baggage Handling System.

Electronic Systems Engineer at Indra - Department of Defense
April - August 2018
